Value proposition

In 2015, I entered the first year of the Electrotechnical and Computer Engineering course at the New University of Lisbon. In 2016, at my request, I moved to the second year of the course of Computer Engineering, after having concluded this was the area with which I most identified.
Since the beginning of my academic career I have tried to develop my skills to in addition to the course and, in that sense, I am part of the NEEC, of which I am the current president.
In this students core I have already performed several activities, such as the organize technological days, and several projects.
These activities have helped me to develop my communication skills, autonomy, teamwork and leadership. I've become more creative, dynamic and proactive.
